Al John Compendio

Workflow Automation Developer | Data Analyst

Taguig, Metro Manila, Philippines | aljohncompendio@gmail.com | ajcompendio-portfolio.netlify.app | linkedin.com/in/al-john-compendio | github.com/a3s5jj

PROFESSIONAL SUMMARY

Workflow automation developer and data analyst who builds reliable systems for customer response, business operations, and reporting. Experienced in developing automations for dental, real-estate, and fitness businesses.

My approach is to understand the business process, identify bottlenecks, and build reliable workflows that fit the team's day-to-day operations. I focus on maintainability and measurable improvement, using AI for interpretation and deterministic rules for critical business actions. Now seeking a full-time role where I can take long-term ownership of internal automation systems and continuously improve them with the team.

PROFESSIONAL EXPERIENCE

Freelance Automation Developer | Client Workflow Systems

February 2026 - Present

Independent

- Built an autonomous AI front desk for a dental clinic, helping increase weekly patients from an average of 14 to 27, a 93% increase, within two weeks.
- Built an automated property tracker for a real-estate client that turns prospect requirements into tailored sample computations and presentations, reducing preparation time from approximately 30 minutes to 5 minutes per prospect.
- Built a membership and attendance tracker for a local gym that centralized member records, streamlined front-desk check-ins and renewals, and enforced access and duplicate-check-in rules.

Real Estate Agent | Market Analysis & Ads Strategy

August 2024 - August 2025

PHirst Park Homes International

- Automated daily synchronization of 3,000+ property listings with event-based n8n workflows that updated and removed records across Excel and Google Sheets, replacing 15 hours of manual updating per week.
- Designed and automated Excel-based sample computations, reducing manual calculation errors by 22% and saving 10+ hours of work per week while improving data reliability.
- Improved Facebook Ads conversion from 3% to 11% through audience and campaign analysis, contributing to 2 property sales.

SKILLS

Automation: n8n, REST APIs, webhooks, retrieval-augmented generation (RAG), Google Workspace APIs

Development & Data: Python, JavaScript, Node.js, SQL, PostgreSQL, Supabase

Analytics: Excel, Google Sheets, Tableau, ETL, data cleaning, deduplication

SELECTED INDEPENDENT PROJECTS

AI Inquiry-to-Quote Automation (n8n + Claude + PostgreSQL) GitHub

- Built a 61-node system that converts email inquiries into rule-priced, staff-approved quotes, follow-ups, and operations briefs; passed 71 deterministic tests, 26 isolated n8n runs, and 8 of 8 live scenarios.

Open-Source Dental AI Front Desk (n8n + Claude + Supabase + Google Workspace) GitHub

- Released an MIT-licensed n8n template based on a real dental-clinic deployment, combining document-grounded patient replies with deterministic booking, rescheduling, and cancellation controls; validated through 58 offline checks.

Document Intake Automation (n8n + Gmail + Google Drive + Google Sheets) GitHub

- Built idempotent workflows that organize email attachments and receipt images in Google Drive with a Google Sheets audit trail; the live-tested Gmail workflow processed 7 attachments with zero errors and created no duplicate records or files when replayed.

Lead Qualification and Outreach Pipeline (Node.js + Python) GitHub

- Built a self-directed pipeline that scraped, deduplicated, enriched, and validated 2,297 business listings, producing 441 contactable leads, removing 59 duplicates, and supporting personalized outreach to 191 prospects.

EDUCATION

Completed coursework toward B.S. Civil Engineering
University of Perpetual Help System DALTA

Senior High School, STEM 2018-2020
Citi Global College - Graduate

CERTIFICATION & LANGUAGES

Google Data Analytics Professional Certificate
Google / Coursera - verify

Languages: Tagalog (native), English (professional working proficiency)
