

Al John Compendio

AI Automation Engineer | Data Analyst

Taguig, Metro Manila, Philippines | aljohncompendio@gmail.com | linkedin.com/in/al-john-compendio | github.com/a3s5jj

PROFESSIONAL SUMMARY

AI automation engineer and data analyst who builds production workflow systems and turns raw data into decisions. Experienced in n8n workflow automation, AI agents with retrieval-augmented generation (RAG), REST API integration, and Python and SQL data pipelines, alongside dashboard development in Tableau and Excel. Google Data Analytics certified. Recent work includes a multi-channel AI agent that handles booking conversations end to end and a lead generation pipeline that screened 2,297 raw records into 441 qualified accounts.

PROFESSIONAL EXPERIENCE

Freelance AI Automation Developer | AI Agent & Data Systems Independent

June 2026 – Present

- Built a 65-node n8n AI agent that handles customer conversations across Facebook Messenger, WhatsApp, and website chat and autonomously books, reschedules, and cancels Google Calendar appointments, validated across 105 end-to-end test executions with zero failures at \$0.04 per conversation.
- Implemented retrieval-augmented generation (RAG) on a Supabase PostgreSQL vector database so the agent answers pricing, hours, and service questions from source documents rather than generating them, with an automated ingestion workflow for new content.
- Engineered a data pipeline in Node.js and Python that scrapes, deduplicates, enriches, and validates business records from Google Maps, the Facebook Ads Library, and a REST API, screening 2,297 raw listings from three sources into 441 verified, contactable leads.
- Launched a 3-touch cold email sequence with 4 A/B tested copy variants and per-record personalized openers auto-generated from the scraped dataset, reaching 191 prospects with no per-record copy written by hand.
- Designed deduplication keys and validation gates for the lead master, enforcing a full source-to-disposition audit trail across a 2,297-row screening log and eliminating 59 duplicate records before outreach.

Real Estate Agent | Market Analysis & Ads Strategy PHirst Park Homes International

August 2024 – August 2025

- Automated daily synchronization of 3,000+ property listings with event-based n8n workflows that updated and removed records across Excel and Google Sheets, replacing 15 hours of manual updating per week.
- Designed and automated Excel-based sample computations, reducing manual calculation errors by 22% and saving 10+ hours of work per week while improving data reliability.
- Analyzed pre-selling property markets and executed Facebook Ads campaigns with targeted strategies, boosting conversion rates from 3% to 11%.
- Developed and executed a Facebook Ads campaign, refining audience targeting to generate leads and successfully convert 2 property sales.

SKILLS

AI & Automation: n8n, AI agents, retrieval-augmented generation (RAG), prompt engineering, Claude API, workflow orchestration
Programming: Python (Pandas), JavaScript, Node.js, SQL
Data & Databases: PostgreSQL, Supabase, vector databases, ETL, data cleaning, deduplication
Analytics & Visualization: Tableau, Excel (advanced), Google Sheets, dashboard development, statistical analysis
APIs & Integration: REST APIs, webhooks, Google Workspace APIs (Calendar, Sheets, Gmail), Meta Graph API
Tools: Git, GitHub, web scraping, Playwright
Professional: Project management, A/B testing and campaign analysis, requirements gathering, technical documentation, problem solving

PROJECTS

AI Front Desk (n8n + RAG)

- Multi-channel conversational AI agent built on a 65-node n8n workflow, with custom tools for calendar booking, rescheduling, and cancellation.
- Document-grounded knowledge base using a Supabase vector store, so answers come from source material instead of model recall.

British Airways Reviews 2016–2023 (Tableau)

- Interactive dashboard using filters, parameters, and calculated fields, built with clean elements for easy interpretation.
- public.tableau.com/app/profile/al.john.compendio

EDUCATION

Completed coursework toward B.S. Civil Engineering
University of Perpetual Help System DALTA
Senior High School, STEM 2018–2020
Citi Global College · Graduate

CERTIFICATION & LANGUAGES

Google Data Analytics Professional Certificate
Google / Coursera · [verify](#)
Languages: Tagalog (native), English (professional working proficiency)
